

Galt Vascular and Interventional Medical Devices

Product Catalog

www.galtmedical.com

Welcome

Galt Medical Corp. has been a leading provider of vascular and interventional medical devices for over 30 years, developing and manufacturing a range of products for interventional procedures. Our regulatory, customer service, engineering, and marketing teams are located in our Garland, Texas headquarters, with manufacturing done both at our Garland location and in Costa Rica.

Galt products are widely recognized by our OEM customers and clinicians for their high-quality design, consistency, reliability, and value. Our manufacturing capabilities include, but are not limited to tipping, forming, shaping, injection molding, hot stamping, hole punching, markings, assembly, packaging, tooling, and rapid prototyping/3D printing. Galt also provides regulatory support to many of its contract manufacturing customers.

Projects range from exclusive, minor modifications of existing Galt products for an OEM partner, to unique products based on an OEM's requirements or specifications. We listen and work closely with our end user and OEM customers to make sure our products address real patient and partner needs. While many of our products serve broad markets and utilize our high-volume manufacturing capabilities, we are proud that several of our products address under-served, niche applications.

Get to know Galt Medical Corp. and our complete offering of access devices. From full kits to individual components, our products are available bulk non-sterile or Galt private labeled.

Trusted Experience. Industry Leaders.

Galt Medical Corp. and TGXCR (Costa Rica) is FDA registered, ISO 13485:2016, EN/ISO 13485:2016, Directive 93/42/EEC certified. We have MDSAP certifications in Australia, Brazil, Canada, and United States. MDD class II and III certifications. Currently our MDR certification is pending. Please contact us for updates.
