

Galt Medical® Corp.

A leader in vascular and interventional medical devices.

MICRO-INTRODUCERS

Micro-Introducer Kits

Galt's Micro-Introducer Kits with smooth transition, 4 and 5 French sizes and Nitinol and stainless wire configurations available.

Stiffen Micro-Introducer System

A reinforced micro-introducer system to facilitate smooth entry into difficult vessels.

Bariatric Micro-Introducer System

Designed for accessing larger patients. Featuring a 15cm stiffen micro-introducer with 19cm dilator and a 12cm introducer needle.

Galt|STICK[®] Introducer System

A 6Fr coaxial sheath assembly with stiffening stylet. Allows for the introduction of a .018" guidewire and .038" working guidewire in percutaneous procedures.

Fluent[™]
TRANSITIONLESS
MICRO-INTRODUCER

The next generation of micro-introducers designed to provide vascular access with less penetration force and a smoother transition.

Disclaimer: Certain products may not be available in all markets.

TEARAWAY INTRODUCER KITS AND SETS

Galt is proud to be an original designer of a tearaway sheath featuring a smooth transition and funnel-shaped entry.

- Available in full kits or individual sets
- Smooth transition
- Available in multiple lengths and French sizes
- Patented 1/4 turn locking system

Micro-Access/MST Introducer Kits

Designed for smaller access sites.

- 3cm, 5cm, 7cm and 10cm lengths with some half-sized configurations
- Smooth transition
- Easy, secure locking system
- Unique wing design
- Funnel-shaped lead-in

MicroSlide 
Pediatric MST Products

A line of vascular access products designed for smaller patients and smaller vessels.

- 2Fr x 3cm and 3Fr x 3cm tearaway introducers
- Available individually or in complete MST Kit
- .008", .010" and .014" diameter guidewires
- 24ga x 2.5cm and 24ga x 4cm needles

GALT 
VTI

Valved Tearaway Introducer Sets

- Size range starting at 5Fr
- Lengths starting at 13cm
- Smooth transition
- Hemostatic valve

CATHETERS

Centeze® Centesis Catheter is designed for centesis procedures featuring large skived holes, a smooth transition, and secure slip fit needle design.

- Tapered tip, smooth transition, and siliconized catheter
- Echogenic needle with bevel indicator
- Clear needle hub
- Available in multiple French sizes and lengths

SPECIALTY GUIDEWIRES

Galt's Specialty Guidewires combine added precision and design needed for today's advanced and complex interventional procedures. Intended for use with diagnostic and therapeutic catheters and interventional devices within the coronary and peripheral vasculature.

- .008", .010", .014", .018", .035" and .038" diameters
- Angled tips, length markings, floppy tips
- Nitinol and stainless wires up to 300cm in length

TRANSITIONLESS GUIDEWIRES

TORX
GUIDEWIRE

- 1:1 Torque and steerability
- Radiopaque tip
- Available in variety of diameters and lengths

HEMOSTASIS VALVE PRODUCTS

Micro-Access Hemostasis Valve Introducer

Providing the benefit of a .018" micro-introducer access within a valve sheath. Reduce steps and inventory with an all-in-one sheath system.

- Smooth transition
- 5.5cm and 12cm lengths available
- Radiopaque band available

Hemostasis Valve Adapter

The attachable hemostasis valve adapter is the answer to minimizing blood loss during the introduction of catheters or devices into the vasculature. For those times in procedures when a device needs to "park" for a period of time, the Valve Adapter is your go-to device.

The Valve Adapter consists of a luer fit hub, a hemostasis valve, and side arm tubing with a stopcock.

Features:

- Ability to pass up to an 8Fr device
- Ability to seal on mandrel wires
- Available bulk non-sterile and sterile private label
- Pressure rated up to 30 PSI

ACCESSORIES

Percutaneous Entry Thinwall Needles

- Features an extra-sharp design
- Available in 2.5cm, 4cm, 7cm and 12cm lengths
- Smooth tip or echogenic tip
- Needle bevel indicator on hub
- 18ga, 19ga, 21ga and 24ga

X Sharp® Needles

Separate, sterile needles

- Needle bevel indicator
- Standard or echogenic
- 21ga x 4cm and 7cm

Dilators

Separate, sterile dilators

- Accepting a .038" diameter guidewire
- The 4Fr dilator accepts a .035" guidewire
- 4 to 16Fr, 18cm length

QUIKTORK™

The quick press and release handling system offers an easy and efficient alternative to the current torque device options.

Available in USA only.

Two options available:

- The yellow QuikTork™ is used with guidewires with diameters between .010" and .020"

- The orange QuikTork™ is used with guidewires with diameters between .025 and .040"

Get to know Galt Medical and our complete offering of access devices. From specialty guidewires to micro, tearaway and valve introducers, Galt Medical provides innovative devices to aid in an efficient and successful procedure. From full kits to individual components, Galt provides the offering right for you.
